

BRAND FOUNDATION • VISUAL IDENTITY • PRODUCT VOICE • SAFETY

Rank Rascal is a gaming identity and rewards experience that turns verified play into Flex Cards, collectible badges, server quests, friend rivalries and ridiculous - but safe - Discord stories.

01

Brand essence

The big idea

Rank Rascal is the chaotic gaming identity and reward layer for Discord. It is not merely a stat tracker. It transforms verified activity into social moments that friends can react to, collect and remember.

Recommended tagline

Play games. Flex achievements. Collect chaos.

Positioning statement

For Discord gaming communities that want more than static leaderboards, Rank Rascal turns verified gaming achievements into collectible, interactive server entertainment. Unlike conventional trackers, it creates identity, quests, rivalries, rewards and community lore around the data.

Core promise

VERIFY Link legitimate game identity	FLEX Turn activity into social cards	COLLECT Earn badges and complete hunts
--	--	--

Audience

Primary: Discord users aged 13+ who play Roblox and enjoy memes, customization, achievement hunting and friendly competition. Secondary: server owners seeking structured engagement without gambling or toxic rankings.

02

Logo and app icon

App icon

Use the head-and-crown mark for Discord, favicons, compact navigation and verification stamps. Its single normal eye represents verified facts; the loading-ring eye represents Razz's chaotic interpretation.

Full mascot

Use Razz, the Rank Rascal, for landing-page heroes, badge reveals, onboarding and campaign artwork. The block proportions connect to the Roblox-first launch without copying Roblox geometry or marks.

Logo direction

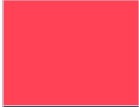

- Crown: ranking, achievement and playful authority.
- Mischievous eyes: the Rascal personality and memorable asymmetry.
- Purple, lime and pink: high-energy collectibility and strong dark-mode contrast.
- Original silhouette: never combine the mark with Roblox, Discord, Fortnite or VALORANT logos.

Minimum-use rule

Use the compact app icon at small sizes. Keep at least 10% clear space. Never stretch, recolor, rotate, crop the crown or place the mark on a visually noisy background.

03

Color palette

	Rascal Purple #7A4DFF	Primary brand
	Toxic Lime #B7FF36	Rewards and calls to action
	Chaos Pink #FF4FA3	Meme accents
	Victory Yellow #FFD83D	Trophies and rare rewards
	Error Red #FF4255	Warnings only
	Midnight #121526	Main dark background
	Panel Navy #191D35	Cards and surfaces
	Cloud White #F8F8FF	Primary light text
	Muted Lavender #AEB4DC	Secondary text

Recommended balance

55% Midnight/Panel Navy • 20% white and muted text • 15% Rascal Purple • 7% Toxic Lime • 3% pink, yellow or red. Lime is a reward signal, not a full-page background.

04

Typography

FREDOKA 700

Recommended display face for hero headlines, badge names, feature titles and short meme captions. Its rounded weight matches the collectible mascot. Web fallback: Arial Rounded, system sans-serif.

Inter 400 / 600

Recommended interface face for navigation, forms, command descriptions, policies and dashboard content. It should carry most functional text.

SPACE MONO 700 / 8,420 RASCAL REP

Recommended numeric face for scores, badge totals, rarity codes and timestamps.

Hierarchy rules

Hero: 52-72 px • Section heading: 32-44 px • Card title: 18-24 px • Body: 16-18 px • Caption: minimum 13 px. Never use distorted “meme” type for instructions, safety notices or buttons.

Sample headline

Your gaming life has officially rotted.

05

Icon and badge system

Icon language

Use chunky, rounded pictograms with a consistent black outline. Core motifs: crown, sparkle, badge, bolt, shield, flame, compass, squad and loading ring. Icons communicate function first; decorative distortion is secondary.

Badge families

ACHIEVEMENT Crown or trophy	EXPLORATION Compass or portal	TEAMWORK Shield or linked hands
COMEBACK Rising bolt	CREATIVITY Spark or prism	SECRET Loading eye

Rarity ladder

COMMON	UNCOMMON	RARE	EPIC	LEGENDARY
--------	----------	------	------	-----------

Reward integrity

Badges reward achievement, exploration, teamwork, creativity, improvement and participation. Never reward premium-currency wealth, excessive playtime, humiliation, harassment or randomized purchases.

Example badge names

Freshly Spawned • Drip Department Survivor • Tiny JPEG Collector • Beef Accepted • Uncooked Arc • Rot Council Member • Lore Explorer • Squad Saint • Certified Rascal

06

Tone and meme rules

Voice formula

VERIFIED FACT + ABSURD INTERPRETATION + OPTIONAL ACTION

Example: "SPYLEAN earned five badges. Bro progressed the lore without filing paperwork."

Brand personality

- Chaotic but friendly
- Meme-aware without copying every temporary trend
- Funny without humiliating users
- Teen-friendly for Discord users aged 13+
- Colorful and collectible
- Confidently incorrect about everything except verified data

Approved examples

- "Three badges detected. The tiny JPEG economy is thriving."
- "The squad completed a quest. Nobody panic."
- "Your avatar passed Drip Inspection. The department remains confused."
- "No progress today. Completely legal. Try again tomorrow."

Never joke about

Bodies or appearance • race • religion • gender • sexuality • disability • mental health • poverty • family situations • self-harm • sexual behavior • real-world violence • personal information • addiction • unhealthy playtime • a person being worthless or unloved.

AI boundary

Launch with curated, moderated meme templates. Do not position Rank Rascal as a romantic, therapeutic or emotionally dependent companion for minors.

07

Product and application copy

Short product description

Rank Rascal turns your gaming life into chaotic Discord competitions. Link Roblox, flex achievements, hunt badges, challenge friends and turn server moments into certified brain rot.

Long product description

Rank Rascal is a gaming identity and rewards bot that transforms verified achievements into Flex Cards, collectible badges, friend rivalries, server quests and ridiculous daily recaps. Connect Roblox, build your Rotfile, inspect your avatar drip, challenge friends and climb the Yapping Order. Fortnite, VALORANT and more game integrations are coming soon.

Discord application description - 382 characters

Rank Rascal turns Roblox achievements into chaotic Discord fun. Link your account, build a Rotfile, inspect your avatar's drip, hunt collectible badges, complete server quests, challenge friends and climb the Yapping Order. Flex verified moments, discover cool experiences and earn Rascal Rep - all with privacy controls and teen-friendly humor. Fortnite and VALORANT are coming soon.

Five discovery tags

ROBLOX	GAMING	SOCIAL	FUN	REWARDS
--------	--------	--------	-----	---------

CTA language

Primary: Add to Discord Secondary: Explore Commands Account: Build Your Rotfile

08

Website information architecture

Primary navigation

/	Product landing and primary invitation
/commands	Searchable command directory
/games	Supported and upcoming games
/games/roblox	Roblox linking, features and status
/rewards	Badges, quests and Rascal Rep
/dashboard	User and server management
/verify	Account-linking entry
/safety	Teen safety and moderation
/privacy	Privacy policy
/terms	Terms of service
/support	Help, reports and deletion
/status	Service health
/invite	Discord installation redirect

Homepage sequence

Hero → interactive Flex Card → Roblox integration → Rotfiles and Drip Checks → Flex Battles → badge hunting → Daily Rot Report → server quests → upcoming games → privacy and safety → final Add to Discord CTA.

09

Product vocabulary

STANDARD TERM	RASCAL TERM
Profile	Rotfile
Linked identities	Rascal Passport
Leaderboard	The Yapping Order
Achievement card	Flex Card
Comparison	Fraud Check
Avatar rating	Drip Inspection
Friend challenge	Beef Contract

Challenge	Unwise Quest
Reputation points	Rascal Rep
Badge collection	Stolen Shelf
Personal record	Suspicious Behaviour
Comeback	Uncooked Arc
Privacy mode	Witness Protection
Top players	The Rot Council
API-confirmed event	Certified Flex

Clarity rule

Every joke label must include a plain-language explanation wherever the user must make a decision. Example: "Witness Protection - hide your profile from rankings and comparisons."

Safety and moderation boundaries

Platform and age

Rank Rascal is designed for Discord users aged 13+ and must respect any higher local minimum age. It must not be marketed toward children who cannot legally use Discord.

Required controls

- Opt-in public profiles and friend competitions
- Witness Protection privacy mode
- Block, report and appeal paths
- Server-level command and announcement controls
- Image and caption moderation
- Rate limits and anti-spam cooldowns
- Clear verified vs. user-submitted labels
- Data unlinking and deletion
- Moderator audit events with limited retention

Hard prohibitions

- No romance, sexual content or simulated intimate dependency with minors
- No therapeutic claims or replacing trusted adults and professional help
- No dangerous real-world challenges
- No gambling, loot boxes or randomized paid rewards
- No premium-currency or spending-based status
- No public exposure of private identifiers, balances or messages
- No harassment, humiliation or identity-based jokes
- No “official skill rank” claims for Rascal Rep

Crisis behavior

If a user expresses imminent danger, the bot should respond briefly and supportively, encourage immediate contact with local emergency help and a trusted adult, and avoid extended pseudo-therapy.

11

Game roadmap and claims

Roblox	LIVE FIRST	Identity, avatars and public badges only until deeper experience integrations exist.
Fortnite	COMING SOON	Do not claim support until an approved data source and account flow are live.
VALORANT	COMING SOON	Requires Riot-compliant product approval and official-rank boundaries.
Other games	IN THE RASCAL LAB	Use discovery language, not integration promises.

Data principle

Collect the minimum data needed to verify identity and create the requested feature. Never ask for game passwords. Do not display premium-currency balances. Treat every game as a separate policy and integration project.

Launch truthfulness

“Coming soon” is acceptable for exploration. “Supported,” “live,” or “verified” must only appear when the end-to-end integration is operating and policy-compliant.

12

Brand governance checklist

Before publishing any Rank Rascal surface, confirm:

- ☐ The app icon is clear and uncropped
- ☐ Colors follow the approved hierarchy
- ☐ Functional copy remains readable
- ☐ Jokes are based on verified or clearly labeled facts
- ☐ No protected game branding implies endorsement
- ☐ Upcoming integrations are described accurately
- ☐ Privacy controls are visible and understandable
- ☐ Rewards do not encourage spending or unhealthy play
- ☐ The surface is appropriate for a 13+ Discord audience
- ☐ Support, reporting and deletion paths are present
- ☐ Terms and Privacy copy match actual data behavior
- ☐ Rascal Rep is never positioned as official skill rank

North-star test

Would this make a teen gaming server more fun without pressuring, humiliating, manipulating or exposing anyone? If the answer is unclear, revise before shipping.

Approved foundation

This document establishes the Phase 1 identity for Rank Rascal. Future website, Discord, badge and campaign work should inherit these rules unless a reviewed brand update replaces them.
